

The Emin Way Presents

# THE TRUTHS WE LIVE BY: THE AUTOMATIC LAWS AND THEIR IMPACT ON US

Watching the world around us, we can see much: people, weather, animals, plants, among many other things. Do we experience them as they really are, or do we see what we want or have been trained to see? Can we, with effort, get behind the story of them?

Enter the automatic laws. Part of nature, they can guide and offer stability in a world departed from the natural way of things. They are there, all the time, ready for our research.

All are welcome to explore these special and practical realms with us this coming Sunday.

*Note: Please wear comfortable clothing, as there will be some movement work.*
